

Brinell Hardness Tester

This machine is used for hardness test of casting metal, forging metal and structures and even irregular specimen can be tested also.

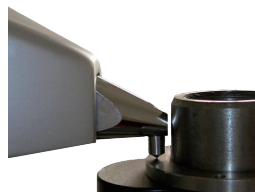

QRDT-10A

Model	QRBH-A101	QRBH-D101
Max Load Capacity	3 000 kgf (30 kN)	
Testing Vertical Gap	210 mm	
Standard Accessories	ball (Ø10, Ø5 mm) plate, V type anvil, Microscope	
Power	-	220 V
Weight (kg)	110	150

Rock Well Hardness Tester

This tester is used to measure degree of hardness of mild steel, hard steels and heat treated steel and operated automatically after loading, therefore it will be able to minimize the error of the individual.

Model	QRRHT-D101	QRRHT-DC101
Initial Load	150 kgf (1 471 N)	115 kgf (1 471 N)
Display	Digital	Digital, computer
Test Load (kgf)	60, 100, 150	
Test Height	200 mm	
Standard Accessories	Ball (Ø10, Ø5 mm) plate, V type anvil, standard sample HRB C scale	
Power	220 V	
Weight (kg)	90	95
