

Thin Film Over Tester

This is a tester to heat thin film of the semisolid asphalt type material.

Model	QRFOT-1101
Rotating Shelf	about 360 mm
Bowl	Ø140 × 10 mm
Temperature	180 - 200 °C
Inside Dimension	400 × 400 × 450 mm
Power	1P, AC 220 V

Say Bolt Viscosimeter

This meter is used to measure viscosity (relative viscosity) of emulsified asphalt or petroleum products that has comparative high temperature.

Model	QRSV-1101
Viscosity Tube	In-outlet Dia. 3.15 mm, 1.76 mm Lower side outlet - cork sealing
Oil Bath	Heater, water cooling, stirrer handle, thermometer, clamp
Receiving Flask	Flask 50 ml
Thermometer	Glass thermometer 2 ea, 100 °C
Accessories	Cleaning device for viscosity pipe, filtering hopper

Flash Point Tester

This is a tester to measure the flash point and fire point of petroleum or petroleum products (asphalt, lubricant).

Model	QRFP-1101
Open Cup	Ø63.5 ± 0.5 mm, H : 33.6 ± 0.05 mm Material : brass (installation of handle)
Test Gas Tube	Gas control valve, gas supply valve
Heating	Electric heating, installation of controller power switch, lamp
Thermometer	Glass thermometer 1 ea, 400 °C
Thermometer Holder	Up-down controller
