

Mold for Cement Length Change

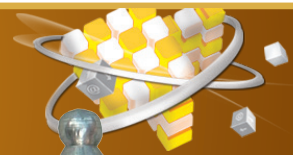

This is a cement mold to measure cement sample length change.

Model	QRMCC-901
Type	3continuous type
Material	Steel
Size	25.4 × 25.4 × 285.75 mm
Weight (kg)	3

Stud For Cement Length Change

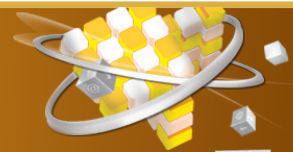

This is jigs for gage mark control bolt of both ends of cement length measurement mold.

Model	QRMCS-901
Material	Stainless steel
Size	Shank : 6.35, length : 20.64 mm
Weight (g)	50

Mortar Permeability Tester

This tester is used to measures the waterproof permeability volume of the cement and the permeability ratio.

Model	QRMPT-901
Permeability Container	Mortar: water injection type 100 gf/cm ² Concrete: pneumatic, hydraulic pressure type 3 kg/cm ²
Pressure Instruments	3continuous type , BS, C-type
Specimen Size (mm)	Ø150 × 40
Water Tank	Tracing acrylic
Compressor	0.75 kW
Dimension (mm)	1 000 × 500 × 2 000
Accessories	Mold 3ea, rubber packing 6ea, handle 1ea
Weight (kg)	180
