

Unit Weight Measure Apparatus

This is used to measure volume of the aggregate by weighting basket.

Model	QRWM-1001	3 ℓ
	QRWM-1002	10 ℓ
	QRWM-1003	15 ℓ
	QRWM-1004	30 ℓ

Rock Test Hammer

This tester is used to measures the strength of rock sample without destroys.

Model	QRRTH-1001
Impact Energy	0.225 m · kg
Measuring Range	51 ~ 1 975 kg/cm ²
Dimension	320 × 100 × 280 mm
Attachment	Scoch stone, recording paper 2roll
Weight	1.45 kg

Automatic Aggregate Stability Tester

This is a tester to test resistance of aggregate against collapse of aggregate by sodium sulfate or saturated solution of magnesium sulfate.

Model	QRAST-1001
Temperature	Room temperature ~ 120 °C
Control	Digital PID controller
Dry Room	650 × 700 × 700 mm
Cooling Room	650 × 700 × 700 mm
Erosion Room	650 × 700 × 700 mm
External Dimensions	1 250 × 1 150 × 2 200 mm
Internal Material	SUS 304
External Material	SS400 Powder coating
Insulation	Ceramic wool+ glass wool
Door Packing	High Temp. grade foamed silicone rubber
Safety Device	Over Temp. limit
Power (kW)	3P, 220 V, 8 kw
Option	Stability container , sodium sulfate
Weight (kg)	1 200
