

Sand Equivalent Tester

This test set is used to measure relative ratio of clay and fine particles and dust in sand soil that is passed through 4.75 mm standard sieve at the site.

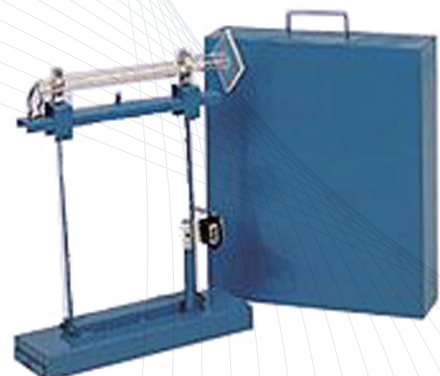

Model	QRSET-1201
Plastic	Ø32 × 430 mm
Measuring Cylinder	Rubber stopper 4ea
Siphon Assembly	Rubber hose, clamp
Irrigation Tube	Ø6 × 508 mm
Measuring Can	Ø50 × 85 ml
Weighted Foot	Guide (indicating plate) sand reading indicator : Ø1.13" × 0.59" rod : Ø1/4 × 17.5" weight : Ø2 × 2.08" foot : Ø1" × 0.54"
Standard Stock Solution	Anhydrous chloride, glycerin, formaldehyde

Equivalent Shaker

This equipment is used to shake sand.

Model	QRES-1201
Operation Type	Motor
Counter	Digital
Motor	0.4 kW
Cylinder Installation	Removable type
Power	220 v
Weight	120 kg
