

## Unconfined Compression Testing Machine

This is a tester to measure the compressive strength ratio of molded soil that is same water content and is kneaded and molded again.

Model	QRUC-1201
Capacity	1 kN
Type	Digital
Load Sensor	Load cell
Displacement	LVDT 0.01 × 10 mm
Standard Test Plate	Ø75 mm
Dimension	about 800 × 450 × 800 mm

## Universal Trimmer

This is an equipment to trim soil sample and prepare test.

Model	QRUT-1201
Type	Manual type
Standard Test Plate	Ø35, Ø50 mm
Dimension	about 200 × 180 × 400 mm

## Wire Saw

This is a tools to cuts the surface of sample.

Model	QRWS-1201
Dimension	about 500 × 150 × 10 mm
